Subject: Ruidoso study report

Ned,

This is to confirm the conversation that you, Jim Chiasson, and I just had. It is ok with NMED if Ruidoso proceeds with its study and report without amending the Molzen – Corbin contract to conform to NMED Construction Program Bureau requirements so long as no funds that are channeled through NMED are used to pay for the study and report. The contract, however, will need to be amended to conform to our requirements for the design phase in order for Ruidoso to access NMED funding for that phase. Jim also wanted to make sure your clients realize that Construction Programs Bureau will need to review, comment on, and approve the study report, even though no NMED funds will be used, because that report will form the basis for the design phase that NMED will be helping to fund.

Please let me know if this is acceptable.

Thanks.

Tannis
